Walking Trails

Photographic hints brought to you by AgfaPhoto

- Be patient. You may need to wait for an animal to move around.
- Don't use flash on the glass areas - you may get flaring.
- Wait for an animal to be in either full sun or full shade - patchy light can be a problem.
- Make sure you can see the animal's eyes - this gives your photo extra life.

NB. Photography taken on the property cannot be used for commercial purposes without the permission of the Zoological Parks & Gardens Board of Victoria.
